A popular product for high traffic washrooms, push taps offer great value for money combined with robust performance. The high quality DVS push tap also offers high levels of water savings, ensuring a short payback period.
DVS offer a variety of self-closing, manually operated taps that are ideal for all industrial and public washroom applications. The range covers many requirements, offering taps for hand, elbow or knee operation.

Features include:
- Up to 50% savings on water costs
- Easy to use
- Adjustable flow rates
- No-touch self-closing operation
- Easy to install and maintain
- High pressure and low pressure taps available
- Various options for either hand, elbow or knee operation
- In-built filter
- Reliable and good value

**HOW THEY WORK**

The average screw head tap will deliver approx 12 ltrs per minute when turned partially on. On average a screw head tap is left on for 15 seconds. Assuming each person on average washes their hands 4 times per day, this equates to 12 ltrs per day. On average the self-closing taps will reduce this to 6 ltrs per day.

With a DVS selectable flow rate push tap installed, the flow rate can be adjusted to run from 4 ltrs per minute and the time on can be reduced to between 3 and 11 seconds. The biggest benefit however is that the push tap cannot be left running, as it self closes. This is particularly important in public toilets.

**ASSUMPTION FOR WATER SAVING PROJECTION**

400 personnel on site washing their hands 4 times per day would be using 4,800 ltrs of water per day. Depending on the flow rate and run time set, push taps could reduce this to 2,400 ltrs of water per day.

Saving 2,400 ltrs per day x 260 working days = 624,000 ltrs of water per annum.

This would also result in a substantial reduction in energy costs as less hot water would be used.

The DVS range of selectable flow rate push taps have many advantages over and above the normal push tap.
Dimensions

ACCESSORIES

MT00-001 Push tap
Fixing: 1/2" BSP (22mmø clearance drill hole)

MT00-006 WM Push tap
Fixing: 1/2" BSP (22mmø clearance drill hole)

MT00-008 Low pressure push tap
Fixing: 1/2" BSP (22mmø clearance drill hole)

MT00-007 Lever clinic tap
Fixing: 1/2" BSP (22mmø clearance drill hole)

MT00-003 WM Push tap
Fixing: 1/2" BSP (22mmø clearance drill hole)

Major clients include:
- Sainsbury’s
- Tesco
- Perth & Kinross Council
- St Andrews Health Care
- HMP Dartmoor
